DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 and 39-44, drawn to structural components of a triangular display, classified in class 463, subclass 30.
- II. Claims 13-38, drawn to a first keno type of game using the triangular game and selecting sections, classified in class 463, subclass 18.
- III. Claims 45-52, drawn to a method for playing a bingo type game with a game sheet, classified in class 463, subclass 19.
- IV. Claims 53-54, drawn to a method of progressive type roulette, classified in class 463, subclass 27.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as using the display to play other types of games than those disclosed in inventions II, III, and IV, such as a video version of the popular game show \$100,000 pyramid. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and separate searches, restriction for examination purposes as indicated is proper.

Art Unit: 3713

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
